Brintons

Project: Hyatt Centric Chicago O'Hare
Details: Wilton Rugs

Brintons collaborated with KOO Architecture on the newly renovated Hyatt Centric Chicago O'Hare, supplying custom Wilton rugs for the hotel's guest rooms.

Drawing inspiration from Chicago's 1933 Century of Progress World's Fair, the hotel's design reinterprets the era's optimism and innovation through a modern lens. Art Deco-inspired geometries, sleek automotive curves, textured materials, and a bold Technicolor-inspired palette come together to create interiors that feel both vibrant and sophisticated.

Brintons' herringbone-inspired Wilton rugs were designed to complement this vibrant visual narrative, at times introducing additional layers of color and, in other spaces, providing a sophisticated backdrop for Hyatt Centric's energetic palette.

"Working with Brintons is always a pleasure. They are thorough, responsive, and have a great color selection!"
