

Brintons

Project: Renaissance Boston Seaport

Details: Axminster & Hand Tufted

Brintons custom carpet plays an integral role throughout the reimagined Renaissance Boston Seaport District, bringing pattern, texture and craftsmanship to an interior inspired by the history and continued evolution of Boston's waterfront.

Across key guest and public spaces, Brintons supplied a combination of custom Axminster broadloom, Axminster rugs and Hand Tufted carpet.

In the presidential guest suites, custom Axminster rugs bring warmth and pattern to the living spaces, creating a more residential feel while maintaining the durability required for hospitality.

Axminster broadloom extends in the club lounge. Beyond the spaces pictured, custom Axminster carpet is found behind the reception desk and throughout the guest corridors, carrying the design experience throughout the property.

In the lobby, a custom Hand Tufted loose lay rug creates a striking focal point at the heart of the arrival experience.

Dimensional texture and craftsmanship add depth to the space while helping define and anchor the surrounding seating area.

Together, these custom flooring applications showcase the versatility of Brintons craftsmanship, bringing different constructions, textures and patterns together within a cohesive interior that reflects the contemporary character of Boston's evolving Seaport.
