Brintons

Project: The Setai Miami Beach
Details: Axminster

Brintons partnered with Next Design Studio to provide custom Axminster carpet at The Setai Miami Beach.

Drawing inspiration from the hotel's Indonesian-inspired design, the carpet captures the essence of the Orient with its sophisticated cinnamon hue, enhanced by terra cotta undertones. Delicate accent patterns seamlessly intertwine with the neutral background, adding visual interest without overpowering the overall ambiance.

More than just a decorative element, this carpet serves a practical purpose by guiding hotel guests to their rooms. Its design enhances the guest experience, evoking a sense of elegance and tranquility from the moment they step into the corridor.

Crafted with meticulous attention to detail, this corridor carpet embodies the seamless fusion of design and functionality, reflecting the impeccable standards of The Setai, Miami Beach.

"Working with Brintons team on this project was an absolute delight! We look forward to our future collaborations."
